Individuals may have between 21 and 12 partial repeats. The repeat shown is defined by SmaI nuclease sites. C; Comment: Serine and threonine residues in the tandem repeat domain are extensively C; Comment: For an alternative splice form without a tandem repeat domain, see PIR:548
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               A; Molecule type: mRNA
